### FEATURE YOUR BRAND

Keep your brand front of mind & create ongoing brand visibility

*Smartlife was born out of a need for integrated technology. Technology that easily integrates into people's lives, and technology that's part of an integrated system. Living a Smartlife means homes and businesses are more energy efficient, secure, and life is easier and more intuitive.*

#### Smartlife App

Smartlife Connect App controls access to the property, intercom, lights, and optionally controls the air conditioning, music, TVs, and entertainment system. Customisable 'role-based' access eg. cleaners, guests etc.

#### Smart digital door lock

Smart digital lock supports keyless entry. Remote control through the App or pin number.

#### Smart Enabled alarm

Remotely arm and disarm the alarm. Detects intruders with motion sensors (and optional door/windows sensors). Integrated smoke detectors to raise fire alarm. Trigger responses- 'all lights on' to get the home owners out of their home safely in an emergency.

#### Cameras

High Definition security cameras with local storage for peace of mind.

#### Access Control

Smart garage door & gate control system enables owner to open the garage door remotely.

#### Lighting Control

Control light circuits & reduce the energy consumption. Controlled by motion or time of day. 'Lived in look' lights turn on and off at night when the owners are away.

#### Modes

'Away mode' turns off the lights, activates the alarm and locks the door all with one click. 'Arrive home' scene- turns on the lights if it's dark, deactivates the alarm, opens the garage door.

#### Multi-room Audio systems and Surround Sound Media Rooms

Control entertainment seamlessly with a simple to use integrated system that does multiple functions with one touch. Discrete recessed speakers in-wall or in-ceiling for quality audio and streamlined modern look.

#### Environment

Eco-friendly, energy saving solutions in the form of lighting control, window treatments, climate control, solar, EV charging, load management, battery backup and more, work to cut down the energy consumption and reduce the home's carbon footprint.

#### Programmed ready for Alexa

Compatible with Alexa & voice control.

#### Future-proofed

The system and new functions upgrade anytime.
